

## **?** About Clear Ballistics Gelatin?

Clear Ballistic products are made of the finest raw materials found in the U.S. and are 100% synthetic and reusable. All of the ballistic gel products we make meet or exceed the FBI standards for measuring ballistic gel. These measurements of consistency and texture are scientifically correlated to swine, which in turn is comparable to human tissue. The calibration of ballistic gel is verified by firing a .177 steel BB at 590 feet per second (fps) into the gel with penetration between 3.25" – 3.74".

Each of our gel is 100% clear providing unmatched viewing of your terminal ballistic testing. Our gelatin is completely temperature stable for all types of climates, even temperatures as hot as Death Valley California where temperatures can reach as hot as 134oF (56.70C). Our Ballistic gel, no matter the size, can sit in any climate and still perform the same as traditional amber gel right out of the refrigerator.

## **!** Uses for Clear Ballistics Gelatin?

Each of our gel products provides unmatched viewing of your terminal ballistic testing. They are 100% clear with no amber haze. They are completely temperature stable for all types of climates, even temperatures as hot as Death Valley California where temperatures can reach as hot as 134oF (56.70C). Our Ballistic gel, no matter the size, can sit in any climate and still perform the same as traditional amber gel right out of the refrigerator.

# CLEAR Ballistics

We are an America company specializing in the manufacturing of 100% clear synthetic ballistic gel, molds, and distributing them to consumers, hobbyist, gun clubs, professional investigation companies, state, local and federal law enforcement agencies. Our flagship product is our ballistic gel. Our ballistic gel is clear as glass, complete reusable, and is ready to use upon arrival. Our ballistic gel provides unmatched terminal ballistics' data for all types of rifles, handguns, machine guns, muzzleloaders, air rifles and pistols, bows, crossbows, spears, knives, and all types of swords.

Clear Ballistics manufactures and distributes molds and re-melting kits. Custom size reforming pans can be made to fit any size custom ballistic gel custom size. The molds and re-melting kits are the key to our cost savings system. We assemble a re-melt kit, which contains all products needed to reform our ballistic gel. We offer reforming services for customers who rather not reform their own block. Detail specifications about all products are listed in our online store under each product.

## Air Block

Great for testing all non-lethal hobby weapons, and commercial-grade air guns.

### Product Specifications

- 9"l x 4"w x 4"h
- 5lbs
- 144 cu in

## Bow Block

Great for testing broadhead penetration and accuracy.

### Product Specifications

- 32"l x 6"w x 6"h
- 36 lbs
- 1152 cu in

## Sniper Block

The Sniper Block is perfect for all deep penetrating rounds.

### Product Specifications

- 32"l x 6"w x 6"h
- 36 lbs
- 1152 cu in

## FBI Block

Perfect for terminal ballistics testing for all handguns and rifles where penetrations are less than 16".

### Product Specifications

- 16"l x 6w x 6"h
- 18lbs
- 576 cu in

# 100%

Crystal Clear  
Odorless  
Reusable  
Heat tolerant  
Consistent

Products include easy to follow directions.

## Cost savings to you!

The key to our cost savings synthetic ballistic gel is its reusability. These processes are called re-melting and re-molding. These two processes are what propel us above everyone else.
