  5. Volume metric: 18878 cubic cm / 18.87 L / 4.15 imperial gals
- **Description:** Our Ballistic Gelatin Sniper Block is perfect for terminal ballistics testing for all handguns and rifles where penetrations are greater than 16 inches. The sniper block allows for penetrate depths of 31 inches. This block impact face measures in at 36 square inches / 232.25 square centimeters. The Sniper block meets FBI ballistics testing protocol 100%, and completely simulates the testing performed by the FBI. These blocks double the length that the FBI and other law enforcement agencies use for terminal ballistics testing and data. Ballistic Gelatin Sniper Block was sized for hunters, hobbyist, semi-professional, and professional shooters, all types of law enforcement agencies, and the average layperson.

For every order of a Ballistic Gelatin Sniper Block, you get the following items:

- Two - ready to use blocks of ballistic gelatin (16L X 6W x 6H) – which are wrapped
- Two - tie-down cords, 6 feet in length
- One - set of instructions for use per order
- One - set of melting instructions per order
- One - outer box containing packing peanuts and the inner box of ballistic gelatin
