

Product Details - Ballistic Gelatin Mold - FBI Block

- **GTIN Compliant UPC Code:** 608729261445
- **Product Dimensions and Weight:**
 1. Size standard: 16 inches in length, 6 inches in width, and 7 inches in height (16L X 6W x 7H)
 2. Size metric: 40.64 cm in length, 15.24 cm in width, and 17.78 cm in height (40.64L X 15.24W x 17.78H)
 3. Volume standard: 672 Cubic Inches / 11.64 US quarts / 2.9 US gals
 4. Volume metric: 11012 cubic cm / 11.01 L / 2.42 imperial gal
 5. 22 gauge galvanized steel
 6. Welded corners
 7. Rounded inside corners
 8. 1 inch handles
 9. All edges are rolled
- **Accessory to:** Ballistic Gelatin FBI Block, Ballistic Gelatin Sniper Block
- **Description:** This mold is used to reform our synthetic ballistic gelatin to the FBI & Sniper Block sizes. Clear Ballistics manufactures this ballistic gelatin mold. This mold size is 16 inches in length, 6 inches in width, and 7 inches in height (16L X 6W x 7H). The height of mold is one inch taller to give lead way while pouring liquid ballistic gelatin to prevent spillage.

All molds are 22 gauge galvanized steel. All edges of the mold are rolled for stability and safety. All corners are weld for strength. The inner corners are round with high temperature silicon, which is heat resistant to 500°F. Each mold is brushed on the exterior with high-speed steel brush. Each mold has one-inch handles to provide strength and ease of transport while wearing protective gear.

For every order, you get the following items:

- One - Metal mold (16L X 6W x 7H)
- One - set of instructions melting instructions per order
